V-SHAPE LYT

EFFORTLESS POWER AND CONTROL

There are limits to what you can do on a conventional ski. But, the new V-Shape is anything but conventional. It's all about the taper ratio. A bigger taper lets the ski work with minimal power, so the ski is much easier to turn and much more responsive and supportive. A smaller taper ratio requires more power but this makes turns more precise and gives even greater stability. The V-Shape takes a good skier and makes them even better.

THE V-SHAPE PHILOSOPHY

HEAD has developed a ski line using Graphene combined with a super-lightweight carbon and karuba wood core, fully embedded throughout the length of the ski. This increases the strength and durability of the ski whilst making it lighter. Unique weight distribution balance has been created by making the tip and tail thicker and the middle section thinner.

Base

Graphene: Integrating Graphene into the construction has two essential benefits: a reduction in weight and an increase in performance.

Karuba: Utilizing karuba wood in the core gives you the perfect balance of density, durability, and weight.

ERA 3.0 is a combination of technologies, shape and geometry in order to achieve effortless handling, more control and instant grip.

FIND YOUR V-SHAPE

Each V-Shape LYT ski gives you effortless control for better steering and increased carvability, thanks to its distinctive taper. You get instant grip on snow, more stability and better vibration dampening control. Carving turns have never seemed so straight forward.

V-SHAPE V10

On the slopes the V-Shape V10 is the ski for skilled riders.
