# VECTOR RS

## DEVELOPED FOR EXPERT SKIERS, WHO ARE LOOKING FOR A PRECISE FIT, AND HIGH PERFORMANCE.

Modern skiing requires comfort, efficiency and control. HEAD's EVO Frame is built around the legendary Vector 98mm last, but features a new highly efficient dynamic frame which directs 80% of the energy from the boot to the rear of the shell.

Sensitive forefoot areas are subjected to lower mechanical stress but need to provide feedback from the snow. The Dynamic Frame has been designed to obtain the best sensitivity and most reactive response from the boot sole when the ski is flexing.
