

DAY LYT

LIGHTWEIGHT CRUISER FOR THE STEEP AND DEEP!

MORE FLOAT

DIRECTIONAL SHAPE WITH A WIDE NOSE MAKES RIDING POWDER EASY.

7% WEIGHT REDUCTION

BY USING OUR LYT BOARD ARCHITECTURE WITH BAMBOO AND HEXAGONAL CORE.

VERSATILITY

WITH HYBRID CAMBER POP CONSTRUCTION FOR SPEED, POP AND CONTROL IN ALL CONDITIONS.

SPLIT READY

WITH BAMBOO STRINGER FOR ADDITIONAL SIDEWALLS WHEN CUT IN HALF.

LYT TECH TECHNOLOGY

HEXAGONAL CORE

Hexagonal Core is a high-tech compound that allows a board to weigh less, but maintain its core strength at the same time. It is arranged zonally in the construction of selected boards.

GRAPHENE

Graphene is a 2D material that even when an atom thick is one of the strongest and lightest materials on earth. Used zonally in a board it magnifies a board's positive characteristics. If compared to usually used carbon, Graphene fibers are much stiffer, at a fraction of weight.

SUPER LIGHT WOOD CORE

Only state-of-the-art ingredients are used for his superlight core construction. Despite the low weight, this board offers unseen power and performance. Stronger and lighter than ever, you will experience a whole new level of riding.

KIZAMU LYT

This board is packed with everything our technology department has to offer, designed for riders with high demands. Although very low in weight, the KIZAMU is a rocket both on- and off-piste. The flex of this board is rather stiff, which is necessary for its extraordinary carving performance. At the same time, the hybrid camber construction, combined with a set-back of 1,5 cm is also the perfect ride for hitting the backcountry. An additional insert pack allows you to mount the bindings even further back on deep days. Speed is guaranteed with its sintered base, and the directional shape assures grip and control in all conditions. Superlight, super strong - that's the KIZAMU.

PRODUCT FEATURES

CAMBER	Hybrid Camber Pop
ARCHITECTURES	Superlight Board Architecture
FLEX INDEX	9
BASE	Sintered Base

PRODUCT DETAILS

LENGTH (CM)	WAIST (CM)	EFFECTIVE EDGE (CM)	SIDECUT (M)	MED. STANCE (CM)	SETBACK (CM)
146	24,6	111,3	6,9	48	1,5
155	25,0	120,3	7,3	54	1,5
161	25,8	126,1	7,8	56	1,5
170	26,6	131,1	8,4	60	1,5

DAY LYT

Built with the deep and steeps in mind the DAY LYT is an unstoppable powder hound. As the name indicates, we made this board even lighter by using Hexagonal Core. This even increases the agility and float of this great cruiser board. With a long floaty nose, short pintail and set back camber the board has the build to blast through powder and groomers. It also has the benefit of being 'Split Ready', with a central bamboo stringer that when cut creates two sidewalls to protect the core from water.
