

ALL-MOUNTAIN

HYBRID CAMBER

Hybrid Camber shapes feature a mix of regular and flat camber and a tapered, narrow waist for increased torsional flex. Outstanding edge hold comes from the camber under the bindings, while the flat camber between delivers responsive fun.

- TORSIONAL WAIST**
makes our Hybrid Camber boards torsional very flexible, therefore playful and forgiving at slower speeds.
- MULTIPLE SIDECUT**
offers the ideal effective edge depending on your speed and tweak. Long, powerful turns at high speed - agile, small turns when riding playfully.
- ADDITIONAL CONTACT POINTS**
Four added contact points, along with a longer effective backside edge and multiple sidecuts, offer a supreme carving performance. They also provide secure grip and control on hard-packed snow or ice, assuring reliability of the board in any conditions.
