REVERSE CAMBER

The development of rocker shapes has been a game changer to snowboarding since it was invented. Reverse camber shapes offer benefits not only for beginners but also for intermediate and advanced riders who appreciate the playful and catch-free characteristics. HEAD offers two types of reverse camber: Flat Rocker and Rocker.

FLOAT IN POWDER

Riding powder is fun, but sinking in not so much. With the early rise and rocker, keeping the tip and tail above the snow makes it easy to ride through deep snow.

CATCHFREE

due to the reduced effective edge, making the board forgiving in situations where extensive edge contact isn't advantageous, such as when learning turns or jibbing.

SOFT & PLAYFUL

and less aggressive than traditional camber, with a shorter effective edge and generally softer flex, making it ideal for playful riding styles, beginners, and intermediates alike.
